1 About CallGuard

What is CallGuard?

CallGuard is a free application that can help you to control calls on your Treo smartphone and manage ringtones.

What does CallGuard do?

CallGuard can help you to manage system ringtones. You can add any mp3 track from your memory card to system tones list just by one tap!
Also CallGuard makes short Treo vibration when the person you are calling answers your call or your call is ended.

Why does it vibrate?

Short vibration is need when your walking or driving. Or in any other case when you cant keep Treo near the ear while calling.

Which sound tracks I can add to system tones?

Sound track must be in mp3 format. Sound track must locate on extension card (in any directory).

Which devices support CallGuard?

CallGuard can run on any Palm OS 5.xx based Treo device (Treo 600 or higher).

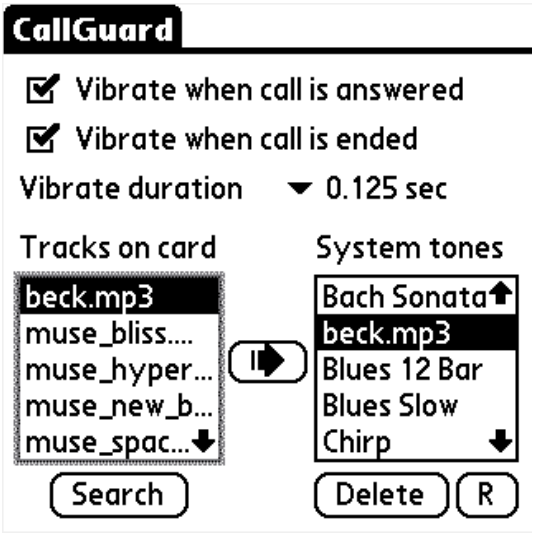
How to install CallGuard?

Install CallGuard just like any other Palm OS application. After installing CallGuard you must reset.

Where I can download latest version of CallGuard?

CallGuard homepage is www.shuba.kiev.ua

1.1 Grafic user interface



Button ⟨Search⟩ - Tap to this button to find all mp3 sound tracks on your extension memory card.

Button ⟨>⟩ - Tap on this button to add selected mp3 sound track to system tones list. After that you can use this sound for any purposes as alerts, phone ringtones, SMS tones and individual tone for any person from your phonebook.

Button ⟨Delete⟩ - Delete selected tone from system tones list. *Be aware!* After removal tone from system tones list all events that have used this tone will change their ringtones to the next on the list. Therefore, before removing ringtones be sure that it was not appointed to any event.

Button ⟨R⟩ - Restore default system tones list. All previously added tones will be removed.

2 Application distribution and warranty
