

MegaHockey v.1.0

Megasoft2000 Ltd.

Palm Software Division (PSD).
Ulyanovsk,
Russia.

Platform: Palm OS 3.0, 3.1, 3.3, 3.5, 4.0

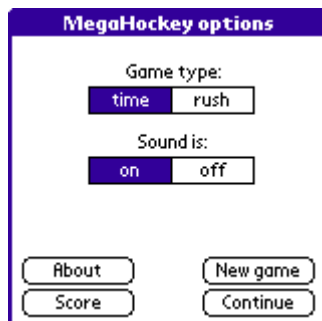

Game description.

The MegaHockey game is an analogy with one of the most popular and classical game: Hockey!

Game installation.

To install this game you should synchronize the "MegaHockey.prc" application to your device.

Play the Game.

Before starting the game you should adjust settings for your forthcoming competition with the goalkeeper.

We offer two game versions to you for choice:

1. Time version - this is playing for time. There are 3 minutes at your disposal. During this time you have to score a goal as many times as possible.

2. Rush version presents you with additional time of 3 sec. for each goal.

For checking your results press the key "Score". Attention! After pressing the "Score" key the screen will display the score available for the active game mode. For example, if "Time" mode is active at the moment but you want to check the score in "Rush" mode, you should firstly change over to "Rush" mode and then press the key "Score".

After all settings are completed press the "New game" key to start the game or the "Continue" key to continue it.

You can control the forward with the help of stylus. For that touch the screen at any point and move the stylus (without releasing it) up or down, left or right. When moving the stylus left or right you can select the strike direction. In order to make a strike move smoothly the stylus (without releasing it) down. The more the stylus is moved down the more powerful is the strike. The strike is being carried out and the puck is directed to the gateway as soon as you release the stylus.

Well, with the other words, to score a goal you should touch the screen with the stylus, select precisely direction and power of the strike and then release the stylus.

"Strike" - total strike number

"Goals" - total goal number

The central indicator on the screen displays the remaining time of the current match.

Free usage of the MegaHockey program is limited by time (14 days) or 5 games.

If you want to buy it address to:
